

INTEGRATED EMERGENCY MEDICAL TRANSPORTATION DATABASE SYSTEM

Abstract of the Disclosure

An integrated medical database system for the emergency medical transportation business is disclosed. The system includes a dispatch module, clinical module, administration module and billing module. Each module may communicate data with one or more of the other modules to form a system incorporating data sharing, thus achieving an end-to-end automation of emergency medical care accounting. Internal consistency checks are performed by the system to ensure that proper treatments are performed according to a chosen diagnosis.
